

~ OCTOBER 2018 NEWSLETTER ~

Monthly Summary

October was distinguished by the return of volatility, as the S&P 500 moved more than 1% in nine out of the twenty-two trading sessions. A barrage of economic and geopolitical crosscurrents spooked investors. All told, domestic stocks ended the month down nearly 7%. Hawkish rhetoric from Fed Chief Powell stirred up fears the Fed may raise too aggressively. Uncertainty surrounding the midterm elections and the potential for expanded tariffs on Chinese imports dominated headlines. Sharp losses in large cap tech stocks led to worries that recent market leaders have peaked and are poised for more declines. Half of S&P 500 companies have reported and over 75% announced positive earnings surprises. Market reaction may be indicating “good news is bad,” meaning strong earnings and economic data may in fact be bad since it could be the impetus for excessive Fed tightening.

In the U.S., large caps outpaced small caps and value outperformed growth. Fixed income declined as rates rose across the curve and credit spreads widened. International markets fared no better than the U.S.. Trade tensions and slowing GDP growth weighed heavily on Chinese markets. Other emerging markets, heavily reliant on China, struggled due to the Middle Kingdom’s weakness, a stronger dollar, and idiosyncratic geopolitical issues. European stocks fell on continued traction from populist movements, Italian budget issues, trade protectionism, and Brexit concerns. Despite these headwinds, the ECB stood firm in its plan to end its bond-buying program in December.

Third quarter U.S. GDP was strong at 3.5%, driven by consumer spending and inventories. Slowing housing, weak business spending, and net exports detracted. Inflation has moderated in recent months after reaching nearly 3% in the Summer. Months like October accentuate the benefits of diversification and how imperative it is to have a portfolio aligned with one’s risk tolerance.

Economic Data

General	Prior	Current
GDP growth	4.2% (Q2 2018)	3.5% (Q3 2018)
Trade balance	-\$50.0B (Jul)	-\$52.2B (Aug)

Indices are unmanaged and cannot be invested into directly. The investment and market data in this newsletter is not an offer to sell or purchase any security or commodity. Past performance does not guarantee future results. The *Bloomberg Barclays U.S. Aggregate Bond Index* is a market capitalization-weighted index comprising Treasury securities, Government agency bonds, mortgage backed bonds, corporate bonds, and some foreign bonds traded in the U.S. The *Bloomberg Barclays Municipal Bond Index* covers the U.S. dollar-denominated long-term tax-exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds, and pre-refunded bonds. The *Bloomberg Barclays Global Aggregate Ex U.S. Index* measures the performance of global investment grade fixed-rate debt markets that excludes USD-dominated securities. The *Bloomberg Commodity Index* measures the performance of the commodity sector representing an unleveraged, long-only investment in commodity futures that is broadly diversified, and primarily liquidity weighted. The *Dow Jones U.S. Real Estate Index* measures the performance of the real estate sector of the U.S. equity market. It includes companies in the following industries: real estate holding and development and Real Estate Investment Trusts. The *Wilshire 5000 Total Market Index* measures the performance of all U.S. headquartered equities with readily available price data. It is market capitalization-weighted and is designed to track the overall performance of the U.S. stock market. The *S&P 500 Index* is a market capitalization-weighted Index of 500 widely held stocks often used as a proxy for the stock market. It measures the movement of the largest issues. Standard and Poor's chooses the member companies for the 500 based on market size, liquidity, and industry group representation. Included are the stocks of industrial, financial, utility, and transportation companies. The *Russell 2000 Index* measures the performance of the small cap segment of the U.S. equity universe. The Russell 2000 Index is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2,000 of the smallest securities based on a combination of their market cap and current index membership. The *MSCI EAFE Index* (Europe, Australasia, Far East) is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. The *MSCI Emerging Markets Index* is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets.
